

ICESTEM 2027 Author Instructions

International Conference on Education, Science, Technology, Engineering, and Medicine
Berlin, Germany | June 21-26, 2027

Use this guide to prepare a manuscript and identify the appropriate submission contact. Abstract-only requirements and current academic arrangements are provided by the coordinators; the manuscript rules below do not create a separate abstract-only format.

1. Abstract submissions and important dates

Abstract submission deadline: May 3, 2027. Acceptance notifications: May 10, 2027. Contact a coordinator for abstract-only submission instructions, including the accepted file format and required information. Full-paper and final-paper deadlines are not specified in this guide.

2. Manuscript format

Prepare the manuscript as a PDF on A4 pages with 1-inch margins. Use Times New Roman. Papers should be 4-10 pages, including tables, figures, and references. The accompanying layout guide illustrates structure; replace its guidance with your own research. The editable LaTeX file can be expanded into a full manuscript.

3. Paper structure

Include the paper title; author names and institutional affiliations; an abstract of 150-250 words and keywords; introduction and research objectives; methodology or research design; results and discussion; conclusion; and references. The abstract length here refers to the abstract within the manuscript.

4. References, figures, and tables

Use APA, IEEE, or a similar referencing style consistently. Cite all sources. Give figures and tables meaningful captions and explain them in the text. Keep labels legible at the final PDF size and confirm that any reused material can be included.

Submission and Academic Arrangements

5. Submission contacts

Send manuscript PDFs to info@icestem.org, addressed to the Registration Coordinator. For abstract requirements or academic enquiries, contact Dr. Julian Bennett: JBennett@icestem.org or Dr. Lukas Müller: lmuller@icestem.org. English is recommended for wider international accessibility.

6. Originality and peer review

Submissions must be original, previously unpublished, and not under review elsewhere. Papers undergo peer review for originality, methodological quality, relevance, and clarity. Cite sources accurately and follow the ethical standards that apply to your research. Late, incomplete, or non-compliant submissions may be rejected.

7. Presentation, registration, and proceedings

ICESTEM 2027 is in person. Accepted papers are presented orally or as posters in Berlin. At least one author of each accepted paper must register for inclusion in the proceedings. Registration is complete only after payment has been received and verified.

Proceedings publishing arrangements have not yet been announced. Inclusion in the program is not a promise of journal publication or indexing. Request current arrangements, presentation durations, poster specifications, and speaker or committee information from the coordinators.

8. Before sending your PDF

Check the page count, A4 size, margins, title and author details, abstract length, references, and figure/table readability. Open the exported PDF to confirm that fonts and symbols display correctly. Remove template guidance and check that the attachment is the intended version.

For an initial enquiry, send only the information needed to explain your question. Do not attach passport copies, payment-card details, or other sensitive records to a general enquiry. Ask the Secretariat for appropriate document-submission instructions if supporting records are requested.
